To Whom It May Concern

This is to certify that Mr. Ngoc Quang Nguyen is a master student under my supervision at Pattern Recognition and Machine Learning Laboratory (PRML), Department of Software in Gachon University. He came to Korea for studying Master program since September 2017 and has studied on machine learning and pattern recognition fields. During the last two years, he has done an excellent job due to his intelligence and hard work. Besides, his solving problem and research skills are truly phenomenal. Now he published 2 peer-reviewed papers in strong journal (Information Sciences ranked with 7.8%, IEEE Access ranked in 15.9% respectively).

I am sure that he has right perspectives and brings out innovative approaches to research and work. I sincerely recommend that he should be encouraged in all his scientific endeavors. He has an amiable character and good conduct. I really appreciate if you can accept his application and give him a chance to show his ability.

Please let me know if I can provide any more information to strengthen Mr. Quang's candidacy for your company.

Sincerely yours,

Sang-Woong Lee, Associate Professor
